

RIASHA DAS

Digital Marketing Executive | SEO • Google Ads • Meta Ads • GA4 • Content Strategy
Kolkata, West Bengal, India | +91 6290561817 | riashadas.official@gmail.com | linkedin.com/in/riashadas

PROFESSIONAL SUMMARY

Digital Marketing Executive with a B.Tech in Computer Science (Data Science) and specialised training in AI-Powered Digital Marketing, covering SEO, Google Ads, Meta Ads, GA4, and Content Strategy. Brings 5+ years of freelance social media and content marketing experience across food & hospitality, publishing, education, and beauty industries, along with a strong project portfolio spanning keyword research, on-page SEO audits, Google Ads campaign structuring, CRO, schema markup, and social media planning. Skilled at combining AI tools (ChatGPT, Claude, Gemini, Perplexity) with SEO/PPC/analytics platforms (Ubersuggest, Screaming Frog, SEMrush, GA4) to build data-driven, measurable marketing strategies. Actively transitioned from a Computer Science background into Digital Marketing through structured, industry-aligned training — bringing both analytical rigor and creative marketing execution to the role.

PROFESSIONAL EXPERIENCE

- Freelance Digital Marketing & Social Media Manager | Self-Employed, Kolkata

Sep 2020 – Present

 - Executed end-to-end digital marketing strategies focused on SEO fundamentals, content marketing, and social media growth across multiple client industries.
 - Managed content planning, publishing cadence, and Google Business Profile optimization to improve local search visibility and engagement for small business clients.
 - Delivered social media management for clients including a cafe chain, a publishing house, a laboratory brand, an education coaching center, and a makeup artist — covering content design (Canva), posting schedules, and community engagement.
 - Tracked weekly performance KPIs and used insights to adjust content and campaign approach, improving engagement rate and organic reach over time.
 - Ran a small-budget promotional ad campaign and supported CRM/review management on food delivery platforms (Swiggy, Zomato).
- Data Visualization Intern | Cognifyz Technologies, Nagpur

Jan – Mar 2024

 - Built interactive dashboards using Excel and Google Sheets to support data reporting and business decision-making.
 - Performed data cleaning and transformation to improve dataset accuracy, and applied data interpretation techniques to extract actionable insights.
 - Created visual reports (charts and graphs) translating raw data into business-ready summaries.

PORTFOLIO PROJECTS — AI-POWERED DIGITAL MARKETING PROGRAM

Practical, tool-based projects completed as part of a structured Digital Marketing training program, applying SEO, paid media, content, and analytics concepts to real-world style briefs.

1. SEO Keyword Research & Search Intent Mapping

- Objective:** Identify a primary keyword and 5 supporting secondary keywords for a target topic, mapped to search volume, keyword difficulty, and search intent
- Tools:** Ubersuggest, Google Keyword Planner

- **Deliverable:** A structured keyword research sheet usable as the foundation for a content or SEO strategy
- 2. Meta Title & Meta Description Optimization**
- **Objective:** Write 5 unique, SEO-optimized meta titles and descriptions following character-limit and CTR best practices
 - **Tools:** ChatGPT, Gemini, Perplexity
 - **Approach:** Applied keyword placement, power words, curiosity/urgency triggers, and character-length discipline (titles 40–60 characters, descriptions 140–160 characters)
- 3. Google Ads Search Campaign Structuring — CV Writing Services (UK Market)**
- **Objective:** Design a lead-generation Search Ads campaign for a UK CV-writing service targeting active job seekers
 - **Tools:** Google Ads, AI-assisted copywriting (ChatGPT/Claude)
 - **Deliverable:** 1 ad group with 15 headlines and 4 descriptions built around pain points (ATS rejection, low callback rate) and conversion-focused CTAs, plus ad extension planning
- 4. Conversion Rate Optimization (CRO) Report & Landing Page Design**
- **Objective:** Audit a website for conversion barriers and propose an improved landing page design
 - **Tools:** Claude, Lovable.dev
 - **Deliverable:** A CRO audit report covering analytics review, A/B testing opportunities, and landing page UX recommendations
- 5. 12-Month Organic Growth Action Plan (UK Market)**
- **Objective:** Build a 12-month organic SEO growth roadmap for a UK-based business
 - **Tools:** Claude, Screaming Frog, SEMrush
 - **Deliverable:** A phased growth plan covering technical SEO fixes, content strategy, and link-building milestones
- 6. On-Page SEO Audit Report**
- **Objective:** Conduct a full on-page SEO audit and present findings in a client-ready format
 - **Tools:** Screaming Frog, Canva
 - **Deliverable:** A visual SEO audit report highlighting technical and on-page issues with prioritized recommendations
- 7. Schema Markup Implementation Project**
- **Objective:** Generate structured data markup to support rich-result eligibility and search visibility
 - **Schema Types:** Article, FAQ Page, Local Business, Organization
- 8. 30-Day Social Media Content Calendar (Facebook & Instagram)**
- **Objective:** Plan a full 30-day content calendar for a chosen brand category following a defined content-mix ratio (40% educational, 30% engagement, and remaining promotional/other content)
 - **Deliverable:** A calendar including platform, content type, topic, caption, CTA, and hashtags for each date
- 9. Meta Ads Campaign Planning — Awareness, Engagement & Traffic**
- **Objective:** Plan a structured Meta Ads account covering 2 Awareness campaigns (hyperlocal ZIP-code targeting vs. city-wide Advantage+ targeting) and 2 Engagement + 2 Traffic campaigns using manual targeting
 - **Tools:** Meta Business Suite, AI-assisted ad copywriting (ChatGPT/Gemini/Claude)
 - **Deliverable:** Campaign structures with defined budgets, targeting logic, and ad copy for each objective
